

Flight Information Display System

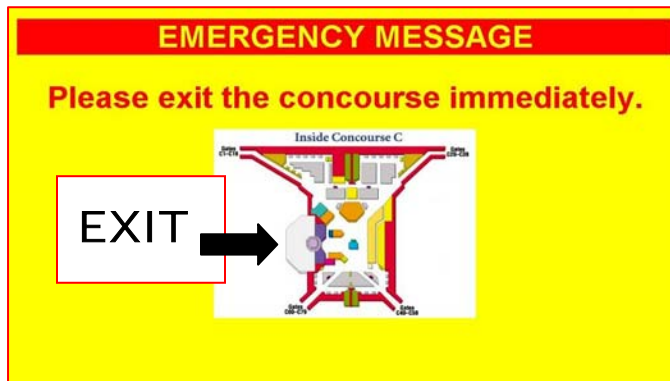

ECLIPSEX™ -Announce

Total Customer Communication

ECLIPSEX-Announce converts your flight information display system (FIDS) into an emergency messaging and customer communication system. Its special messaging features make ECLIPSEX a **total customer information system** — one that meets the communication needs of today's airports and their passengers.

ECLIPSEX-Announce provides

- **Emergency messaging by airport zone**
- **Check-in counter messaging**
- **Security messaging**

Immediate Messaging When and Where You Need It

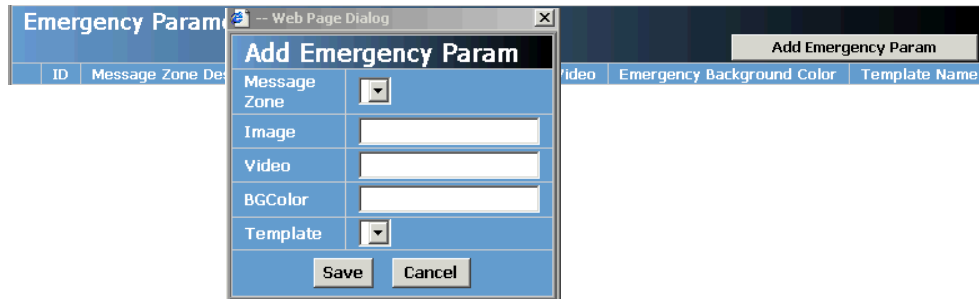

With ECLIPSEX-Announce, messages can be quickly and effectively displayed on FIDS displays throughout the airport by zoned area.

Emergency and security messaging can notify specific passengers of special conditions or instructions (e.g., evacuation) or to proceed to a special location for baggage inspection.

Check-in counter messaging informs queued passengers of wait times and can notify passengers leaving on soon-to-depart flights to move ahead in line.

The ECLIPSEX Advantage

ECLIPSEX-Announce is an integrated ECLIPSEX module that offers all the user-friendly features of the ECLIPSEX family of FIDS products. Messages are easy to create and hold for scheduling, using ECLIPSEX's convenient pages and dialogs.

Versatile Information Display Products

The ECLIPSEX product family has been designed to respond to your changing needs with flexibility and ease. Com-Net offers you not just a messaging module for emergency and customer communication, but also integrated solutions for information display, seamless connection to other systems, AODB, reporting, Web integration and wireless access.

Contact your Com-Net representative today to see how ECLIPSEX can work for you.
